

INTRODUCTION

At Inside Out Contacts, we offer three fabric ranges, as easy as A, B, C - each thoughtfully curated to ensure the highest quality and trend-forward palettes to suit your budget and deliver impeccable commercial upholstery.

Range A brings together our most cost-effective options, delivering exceptional value without compromising on durability or style. From vinyl and faux leather to woven, real leather and high-performance textiles, these fabrics come in a wide array of colours and are suitable for both heavy-duty and lighter contract environments.

Each collection includes detailed information on composition, fire retardancy, and added performance benefits, helping you find the right upholstery with confidence.

Performance & Sustainability Summary

- 

Aquaclean R – Technology allowing stains to be removed using only water.
- 

Crib 5 – UK fire test ensuring upholstery can withstand a simulated burning crib source.
- 

Stain Resistance – Fabric surface repels stains, making spills easier to clean.
- 

Water-resistant - Fabric resists light water exposure.
- 

Light Fastness – Resistance to fading when exposed to light.
- 

Flame Retardancy – Fabric resists ignition and slows fire spread for safety.
- 

Antimicrobial & Antifungal – Inhibits growth of bacteria and mould on the fabric.
- 

Washable – Fabric can be safely cleaned with water without damage.
- 

Recycled Yarns – Fabric made using yarns sourced from recycled materials.
- 

Everclean+ – Protective finish improving cleanability and durability.
- 

Halogen Free – Contains no halogen-based chemicals, reducing toxic emissions when burned.
- 

Recyclable – Fabric or material can be processed for reuse at end of life.
- 

Cal 117 – U.S. fire test standard ensuring upholstery can resist ignition from a smoldering heat source.
