

INTRODUCTION

At Inside Out Contacts, we offer three fabric ranges, as easy as A, B, C - each thoughtfully curated to ensure the highest quality and trend-forward palettes to suit your budget and deliver impeccable commercial upholstery.

Range B offers the perfect balance of high performance and mid-range pricing, giving you elevated quality without the premium cost. A combination of enhanced durability with refined aesthetics, making range B the ideal choice for projects that require both resilience and style. From performance textiles to robust woven fabrics and premium faux leathers, Range B provides a broad selection of colours and finishes to complement any design scheme.

Each collection includes detailed information on composition, fire retardancy, and added performance benefits, helping you find the right upholstery with confidence.

Performance & Sustainability Summary

- 

Aquaclean R – Technology allowing stains to be removed using only water.
- 

Crib 5 – UK fire test ensuring upholstery can withstand a simulated burning crib source.
- 

Stain Resistance – Fabric surface repels stains, making spills easier to clean.
- 

Water-resistant - Fabric resists light water exposure.
- 

Light Fastness – Resistance to fading when exposed to light.
- 

Flame Retardancy – Fabric resists ignition and slows fire spread for safety.
- 

Antimicrobial & Antifungal – Inhibits growth of bacteria and mould on the fabric.
- 

Washable – Fabric can be safely cleaned with water without damage.
- 

Recycled Yarns – Fabric made using yarns sourced from recycled materials.
- 

Everclean+ – Protective finish improving cleanability and durability.
- 

Halogen Free – Contains no halogen-based chemicals, reducing toxic emissions when burned.
- 

Recyclable – Fabric or material can be processed for reuse at end of life.
- 

Cal 117 – U.S. fire test standard ensuring upholstery can resist ignition from a smoldering heat source.
